1 Foreword

Thank you for choosing this mobile phone – you have made a wise choice, congratulations!

Our cellular phones are approved for GSM networks and meet stringent European standards. Your phone may be used internationally with various networks depending on your roaming arrangements with your service provider.

To use this phone you must subscribe to a GSM service from a provider. We have included many features in this device but their function depends on the features available with your subscribed wireless network.

Please contact your service provider for more information. This User Manual is published by the manufacturer without any warranty. Revisions and improvements resulting from typographical errors, inaccuracy of current information, and improvements to the device or software may be done without any prior notification, but will be incorporated into newer editions. More information and help on your phone may be available at the manufacturer's website. The manufacturer reserves all rights to the contents herein.

Copyrights and trade marks mentioned in this document remain with their respective owner, Reproduction, transfer, storage, or distribution in whole or in part of copyrighted materials without prior written permission is expressly prohibited. We strongly recommend you carefully read and understand this manual before using your phone in order to keep it under best conditions for your effective usage and utmost satisfaction.

2 Safety

Never attempt to disassemble your phone. You alone are responsible for how you use your phone and any consequences of its use.

As a general rule, always switch off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.

Do not use your phone in damp areas (bathroom, swimming pool...). Protect it from liquids and other moisture.

Do not expose your phone to extreme temperatures lower than - 10°C and higher than + 55°C.

The physicochemical processes created by chargers impose temperature limits when charging the battery. Your phone automatically protects the batteries in extreme temperatures.

Do not leave your phone within the reach of small children (certain removable parts may be accidentally ingested).

Electrical safety

Only use the chargers listed in the manufacturer's catalogue. Using any other charger may be dangerous; it would also invalidate your warranty. Line voltage must be exactly the one indicated on the charger's serial plate.

Aircraft safety

When traveling by plane, you will need to switch your phone off when so instructed by the cabin crew or the warning signs. Using a mobile phone may be dangerous to the operation of the aircraft and may disrupt the phone network.

Its use is illegal and you could be prosecuted or banned from using cellular networks in the future if you do not abide by these regulations.

Explosive materials

Please comply with warning signs at petrol station asking you to switch your phone off. You will need to comply with radio equipment usage restrictions in places such as chemical plants, fuel depots and at any location where blasting operations are under way.

Electronic equipment

To avoid the risk of demagnetization, do not let electronic devices close to your phone for a long time.

Electronic medical equipment

Your phone is a radio transmitter which may interfere with electronic medical equipment or implants, such as hearing aids, pacemakers, insulin pumps, etc. It is recommended that a minimum separation of 15 cm be maintained between the phone and an implant. Your doctor or the manufacturers of such equipment will be able to give you any advice you may need in this area.

Hospitals

Always make sure that your phone is switched off in hospitals when so instructed by warning signs or by medical staff.

Road safety

Do not use your phone when driving. In order to give your full attention to driving, stop and park safely before making a call. You must comply with any current legislation.

Distance of operation

This phone model has been tested and meets radiofrequency exposure guidelines when used as follows:

- Against the ear: place or receive a phone call and hold the phone as you would a wire line telephone.
- Body worn: when transmitting, place the phone in a carry accessory that contains no metal and positions the phone a minimum of 2.5 cm from your body. Use of other accessories may not ensure compliance with radiofrequency exposure guidelines. If you do not use a body worn accessory and are not holding the phone at the ear, position the phone a minimum of 2.5 cm from your body,
- Data operation: when using a data feature, position the phone a minimum of 2.5 cm from your body for the whole duration of the data transmission

6 Accessories

Use only batteries, chargers, and accessories approved by the manufacturer of this device. Use of any other types will invalidate the warranty and may be dangerous. Check with your dealer for available accessories. You may opt to buy:

Extra Battery

Charger Plug, charger cable

Charger plug used to connect with the charger cable for charging on wall outlets. Also you can use the charger cable to connect with the other devices such as smartphones to charge the phone.

Charging time is about 2 to 3 hours. The charging condition is displayed on screen. You may use your phone while charging.

7 Caring for Battery

This phone uses a rechargeable battery as power source, when the charge is weak, recharge immediately to protect the battery life. It is best to drain the battery charge first.

When not using the charger, unplug it from the power source and the phone. Over charging will shorten the battery life. Don't leave the charger connected to the unit or battery for more than a week.

Temperature affects battery charge capacity.

Your battery may need to be warmed up or coolen down before charging. If the battery temperature is lower than 0°C and higher than + 45°C, it will not recharge.

Use the battery as it is originally intended. Do not short circuit the battery by connecting the positive and negative terminals with a conductor.

Do not use a damaged battery.

The battery will not perform properly and its life will be shortened if exposed to extreme temperatures.

Do not place the battery in fire, follow local laws and ordinances in disposing used battery.

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly. Electric and electronic equipment and batteries is marked with the crossed out trash can symbol, seen below. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

As the end user it is important that you submit your used batteries to the appropriate and designated facility. In this manner you make sure that the batteries are recycled in accordance with legislature and will not harm the environment.

All cities have established collection points, where electric and electronic equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.

Hereby, Inter Sales A/S declares that the radio equipment type BAS-18250M is in compliance with Directive 2014/53/EU. Los equipos eléctricos y electrónicos, y las pilas o baterías incluidas, contienen materiales, componentes y sustancias que pueden ser perjudiciales para su salud y para el medio ambiente, si el material de desecho (equipos eléctricos y electrónicos y baterías) no se manipula correctamente.

Los equipos eléctricos y electrónicos, y las pilas o baterías incluidas, llevan un símbolo de un cubo de basura cruzado por un aspa, como el que se ve a continuación. Este símbolo indica que los equipos eléctricos y electrónicos, y sus pilas o baterías, no deberían ser eliminados con el resto de basura del hogar, sino que deben eliminarse por separado. Como usuario final, es importante que usted remita las pilas o baterías usadas al centro adecuado de recogida. De esta manera se asegurará de que las pilas y baterías se reciclan según la legislación y no dañarán el medio ambiente.

Todas las ciudades tienen establecidos puntos de recogida, en los que puede depositar los equipos eléctricos y electrónicos, y sus pilas o baterías gratuitamente en los centros de reciclaje y en otros lugares de recogida, o solicitar que sean recogidos de su hogar. Puede obtener información adicional en el departamento técnico de su ciudad.

5 Informazioni e avviso sulla sicurezza

Prima di utilizzare il telefono, leggere attentamente le precauzioni di sicurezza e informarne i bambini, in modo da poter utilizzare il telefono in modo corretto e sicuro.

Non accendere il telefono quando è vietato o quando l'uso del telefono può causare interferenze o situazioni di pericolo.

Non utilizzare il telefono mentre si è alla guida.

Spegnere il telefono quando si è vicini ad apparecchiature mediche e seguire le regole o i regolamenti di ospedali e altre strutture.

Spegnere il telefono quando si è in aereo. Il telefono potrebbe causare interferenze ai segnali di controllo dell'aereo.

Spegnere il telefono quando ci si trova in prossimità di dispositivi elettronici di alta precisione. Il telefono potrebbe influire sulle prestazioni di questi dispositivi.

Non tentare di smontare il telefono o gli accessori da soli. Solo il personale qualificato è autorizzato a prestare assistenza o riparare il telefono.

Non posizionare il telefono o i suoi accessori ove sia presente un forte campo elettromagnetico.

Non posizionare supporti di memorizzazione magnetici vicino al telefono. Le radiazioni dal telefono possono eliminare le informazioni memorizzate su di essi.

Non porre il telefono in un luogo ad alta temperatura con gas infiammabili come una stazione di servizio.

Tenere il telefono e i suoi accessori lontano dalla portata dei bambini. Non consentire ai bambini di utilizzare il telefono senza una guida adulta.

Per evitare problemi, utilizzare batteria e caricabatterie originali.

L'attrezzatura elettrica e elettronica incluse le batterie contengono materiali, componenti e sostanze che possono essere dannose per la salute e l'ambiente se il materiale di scarto (attrezzatura elettrica ed elettronica gettata e batterie) non è gestito correttamente. L'attrezzatura elettrica ed elettronica e le batterie sono segnate con una croce sul simbolo del cestino, visto sotto. Questo simbolo significa che l'attrezzatura elettrica e elettronica e le batterie non dovrebbero essere eliminate con altri rifiuti domestici ma dovrebbero esserlo separatamente.

E' importante che inviate le batterie usate alle strutture appropriate e indicate. In questo modo vi accertate che le batterie siano riciclate secondo la legislatura e non danneggiano l'ambiente.

Tutte le città hanno stabilito punti di raccolta dove l'attrezzatura elettronica ed elettrica e le batterie possono essere inviate senza spese alle stazioni di riciclaggio e altri siti di raccolta o raccolti da casa. Informazioni aggiuntive sono disponibili al dipartimento tecnico della città.
